¹⁾ The fee schedule for **Biowaste Organisations (BIOO)** is based on the current published waste statistics of the EU (€STAT)

http://appsso.€stat.ec.€pa.eu/nui/show.do?dataset=env_wasmun&lang=en.

30 to 40 % of municipal solid waste is bio-waste. For the calculation of fees 30 % of municipal waste is taken into account (1.000 t bio-waste/a * 0,001 €). In some cases (like implementing of bio-waste management or separate collection in countries) the fee can be increased in 3 steps (25%, 50%, 75%) in the first years.

Biowaste organisations (BIOO) are defined as organisations supporting the sustainable management of biowaste and the recycling of organic materials. This includes waste management organisations, compost/soil improver organisations and biogas/digestate organisations, as well as quality assurance organisations in the field of organic material recycling. In comparison to the membership type "Bio-waste organisation" (BIOO) the membership type "**Non-profit environmental organisation**" (NPEO) does not work specifically in the field of biowaste or organic recycling.

²⁾ The **categories for cities and municipalities** are categorized based on the OECD EC definition for urban centre. In some cases (like implementing of bio-waste management or separate collection in cities or municipalities) the fee can be increased in 3 steps (25%, 50%, 75%) in the first years.

³⁾ The fees of **Commercial / Public Organisations (CPO)** are based on the number of employees.

⁴⁾ The fees were agreed at the Annual meeting 2020.
